

Want help managing your patients with Alcohol and Other Drugs issues?

We're 'GLAD' to help

'GLAD' is the General Practice Liaison in Alcohol and Other Drugs Project. We're here to help with your patients in a new collaborative initiative with Drug Health Services in all three Local Health Districts: Sydney Local Health District (SLHD); South East Sydney Local health district (SESLHD); and St Vincent's Health Network (SVHN).

The aim of the project is to assist public Drug & Alcohol Services to work collaboratively with you and your General Practice. Our goal is to improve professional relationships between our services and GPs, and the health and wellbeing of people in our community.

GLAD can provide support by D&A Nurse or Staff Specialist for you and your patients including:

- Phone advice
- Assessments and treatment plans
- Collaborative/shared care
- Education for you and your patients
- Referral pathways
- Practice visits

TO ARRANGE D&A REFERRAL, PLEASE CONTACT:
