

Electronic Prescription Checklist for Pharmacy

Required	Why is this required?	Action
Connection to a prescription delivery service.	Two Prescription Delivery services are available – Erx or Medisecure. Electronic prescriptions are sent from prescribers software via the PDS in an encrypted format. Pharmacies can then access the encrypted files from the service. These services are interoperable.	Register for ERx here or Register for Medisecure here
Organisation requires a Healthcare Provider Identifier – Organisation (HPI-O) and connection to the HI service.	All organisations who wish to issue or dispense electronic prescriptions require an HPI-O. If you are registered for the My Health Record system you already have an HPI-O	Register organisation for an HPI-O here
Consider workflow arrangements and latest update of clinical software	May require barcode scanners or new process at script in counter. Contact software provider for workflow queuing solutions if required. (Barcode scanners with 2D capability may be required for scanning electronic prescription tokens. (not mandatory))	Contact clinical software provider
